## Additel 151 Digital Pressure Modules

- Accuracy of 0.02%FS, 0.01%FS or 0.01%RD
- Fully temperature compensated accuracy
- Two pressure ranges per module
- Advanced temperature compensation
- ISO 17025 accredited calibration and data included
- Optional calibration fixture with software

**ADT151 Module** 

#### **OVERVIEW**

Additel's 151 pressure modules have been designed with flexibility and efficiency in mind and can easily be swapped out as needed to meet changing needs and workloads. Higher pressure ADT151 modules cover two separate pressure ranges and come with individual calibrations for each range. This allows for each module to accuracy cover a wide range or pressure workloads. Also, each ADT151 is available in (3) different accuracy levels (0.02% FS, 0.01% FS and 0.01% of reading) to meet the demanding needs of our customers. Additel's 151 pressure modules provide users with the flexibility and dependability end users have come to expect.

#### PRESSURE RANGE

The following tables mainly describes the range, accuracy, and precision of the ADT151 pressure modules. For pressure modules of gauge pressure (GP) and differential pressure (DP) and compound pressure (CP), the zero drift can be eliminated by regular zeroing of the device. The specifications are valid at ambient temperatures from 15°C~35°C. We recommend that these pressure models be calibration annually. ADT151 module provides single-range and dual-range, users can choose according to needs.

Precision: The error components include linearity, hysteresis, repeatability, resolution and temperature compensation. Accuracy: The error components include linearity, hysteresis, repeatability, resolution, reference standard measurement uncertainty, annual drift, temperature compensation, K=2.

#### **BAROMETRIC MEASUREMENT SPECIFICATIONS**

Model <sup>[1]</sup>	Absolute Pressure Range	Accuracy
ADT151-BP	(60~110) kPa	±22 Pa
ADT151-BPH	(60~110) kPa	±10 Pa

[1] A barometric pressure module is optional for ADT773/ADT793. After inserting the barometric pressure module, the controller can be toggled to and from gauge and absolute pressure units.

<sup>[1]</sup> For the full-scale accuracy, FS refers to the upper limit of the range - the lower limit of the range.
[2]The second range (-10~10)psi accuracy is 0.02%FS, the precision is 0.01%FS.
[3] Precision: the error components include linearity, hysteresis, repeatability, resolution, and temperature compensation.

<sup>[4]</sup> Accuracy: the error components include linearity, hysteresis, repeatability, resolution, reference standard measurement uncertainty, annual drift, temperature compensation, K=2.

<sup>[1]</sup> FS means upper range - lower range.
[2] Recommended calibration cycle 180 days.
[3] DP300 to DP1000 provides positive range, accuracy and precision specifications continue to apply;

DP10 to DP150 provides a positive range with accuracy and precision specifications of 0.02%FS and 0.015%FS, respectively; DP2 to DP5 provides a positive range, with accuracy and precision specifications of 0.05%FS and 0.025%FS, respectively.

<sup>[4]</sup> Precision: the error components include linearity, hysteresis, repeatability, resolution, and temperature compensation.

[5] Accuracy: the error components include linearity, hysteresis, repeatability, resolution, reference standard measurement uncertainty, annual drift, temperature compensation, K=2.

<sup>[1]</sup> Absolute pressure is achieved through the synthesis of the basic gauge pressure module and the optional atmospheric pressure module.

<sup>[2]</sup> The accuracy of the negative pressure part is equal to the accuracy of the positive pressure part, such as the maximum error of -15 psi is equal to the maximum allowable error of 15 psi.

<sup>[3]</sup> FS refers to the positive range, and the accuracy of the negative pressure part is equal to that of the positive pressure part.

<sup>[4]</sup> Precision: the error components include linearity, hysteresis, repeatability, resolution, and temperature compensation.

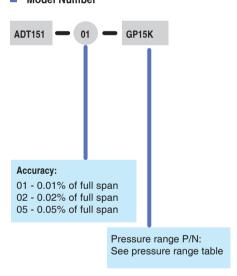

[5] Accuracy: the error components include linearity, hysteresis, repeatability, resolution, reference standard measurement uncertainty, annual drift, temperature compensation, K=2.

#### **GENERAL SPECIFICATIONS**

	Standard presicion			High-precision		
Model	CPXX	DPXX	GPXX		CPXM	Metrology Made Simple
Operating temperature	0.01%FS accuracy: 15 °C to 35 °C ( $59$ °F to $95$ °F) Other accuracy: -10 °C to $50$ °C (14 °F to $122$ °F)					
Storage temperature	-30°C to 70°C (-22°F to 158°F)					
Relative humidity	10% to 95% RH,non-condensing					
Pressure connection (for external use only)	6 mm (O-ring,3*1.5-NBR70)					
Enclosure (for external use only)	Aluminum					
Dimensions (Dia x H)	30 mm x 80 mm x 91mm(1.18" x 3.15" x 3.58")					
Weight	0.5 kg (1.1 lb)					
Warranty	1 Year					

#### **ORDERING INFORMATION**

### Accessories included ISO 17025 accredited Calibration Certificate
