

BROADBAND DIPOLE
SAS-200/530

The SAS-200/530 is a Broadband (or "fat") dipole antenna that provides calibrated reception of electromagnetic energy over the frequency range of 160 to 500 MHz. The SAS-200/530 may be used over a broader range for monitoring purposes. The antenna is ruggedly constructed of aluminum members. The antenna is designed for use in either a shielded enclosure or for use as an externally mounted unit. It is strong, light-weight, transportable and corrosion-resistant.

FEATURES:

- Broad Frequency Coverage:
160-500 MHz
- Removable Elements for Portability and Storage
- Shielded Room or Out-of-Door Use
- No Tuning Required

APPLICATIONS:

- RFI/EMI Testing
- TEMPEST Testing
- Frequency Management
- Surveillance
- Electronic Warfare

SPECIFICATIONS:

Frequency Range:	160-500 MHz
Impedance:	50 ohms Nominal
Connector	BNC
Size:	22" x 24"
Weight:	2.9 lbs (1.3 kg)
