

AS-03

Antenna Set 30 MHz to 6 GHz

Main Features

- 30 MHz to 6 GHz frequency range
- Excellent Antenna Factor
- Tripod adapter for easy vertical-horizontal polarization change
- Individual calibration
- Robust, rustproof aluminium construction
- Lightweight

AS-03 is a compact size broadband Antenna System composed of a BC-01 Biconical Dipole, LP-02 and LP-03 Log Periodic Dipole Array designed for radiated emissions and immunity testing.

It can be used in conjunction with any receiver or spectrum analyzer.

Its ideal companion is the EMI Receiver Unit 9060 that can be easily mounted on the antenna mast (*).

(*): The direct connection between antenna and PMM Receiver Unit eliminates additional sources of uncertainties due to coaxial cable attenuation and scattering. For further information please consult our brochure "Fully CISPR-Compliant Digital EMC/EMI receivers 10 Hz to 18 GHz".
