#### Ultrasonic Flow Meter Flowmeter

Designed to measure the flow of liquids and slurries in pipes, with minimum one inch diameter.

#### Applications

- Where a portable device is required
- Where a non-penetration device is desired, due to installation requirement or properties of the liquid
- Where the liquid is contaminated, corrosive or for other reasons, not simply measurable by conventional devices
- Lower cost over conventional devices for solids or slurry flow

#### Specifications

- Range: 0 to 20 fps or equivalent GPM, MGD
- Indicator: Alpha-Numeric LCD display - 8 digit
- Standard Output: 4-20 mA into 600 ohms max., isolated
- Power Requirements: 120 VAC, 50/60 Hz or internal rechargeable battery system
- Totalizer: 6 Digit x 1, or x 10, or x 100, or x 1,000, or x 10,000, or x 100,000, or x 1,000,000 units alpha-numeric display, resettable
- Transducers: Two model T-903 Transducers w/20 ft. retractable cord, strap and acoustical grease in accessory carrying pouch
