DELTA4000 Series
12 kV Insulation Diagnostic System

- Easy to use with automatic and manual operation
- Accurate and repeatable measurement results with high noise suppression for the most extreme conditions
- Lightweight, rugged two-piece design, with unit weights of 14 kg and 22 kg
- New built-in intelligent temperature correction eliminates the need for temperature correction tables (patent pending)
- New automatic voltage dependence detection (patent pending)

DESCRIPTION
The new DELTA4000 Series is a fully automatic 12 kV insulation power factor/dissipation factor (tanδ) test set designed for condition assessment of electrical insulation in high voltage apparatus such as transformers, bushings, circuit breakers, cables, lightning arresters and rotating machinery. In addition to performing insulation power factor tests, the DELTA4000 Series can be used to measure the excitation current of transformer windings as well as to perform automatic tip-up tests and HV turns-ratio testing (an optional TTR Capacitor is available).

The test set is designed to provide a comprehensive AC insulation diagnostic test. The high power variable frequency design generates its own test signal independent of line frequency quality and the hardware design uses the latest technology available for digital filtering of the response signal. As a result, the DELTA4000 Series produces reliable results and stable readings in the shortest time with the highest accuracy, even in high interference substations.

The DELTA4000 Series operates with PowerDB software for automatic testing and reporting or with Delta Control software for real-time manual testing.

Measurements include voltage, current, power (loss), tan delta, power factor and capacitance. The test results are automatically stored in the computer and can also be downloaded directly to USB storage or a printer.

DELTA44110 test set is to be used with an external computer (not included) while the DELTA4310 test set comes with an onboard computer.

APPLICATIONS
- Power transformers
- Distribution transformers
- Instrument transformers
- Rotating machines
- Oil insulation
- Bushings
- Cables
- Capacitors
- Circuit breakers
- Surge arrestors

TEST CAPABILITIES
- Power factor
- Dissipation factor (tanδ)
- Excitation current
- Automatic tip-up
- Watts loss
- Inductance
- Capacitance
- Voltage
- Current
- "Turns ratio"* with optional accessory
FEATURES AND BENEFITS

Industry-Leading Performance and Accuracy

- Generates its own test signal – resulting in accurate and clean measurements even in the most severe conditions and in the event power is required from a portable generator.
- High noise suppression and advanced signal acquisition circuitry can handle up to 15 mA interference current or a signal to noise ratio of up to 1:20 resulting in extremely accurate and clean measurements even in the most severe conditions.
- Industry leading frequency range (1-500Hz) reveals details in the insulation characteristics that are not possible to detect with other test sets.
- Intelligent temperature correction (patent pending) allows the user to estimate the actual temperature dependence of the test object by measuring tan delta over a frequency range. Mathematically calculating accurate individual temperature correction results in a more accurate measurement of the insulating material’s condition.
- Automatic voltage dependence detection (patent pending) Various high voltage components may have a voltage dependence where tip-up testing is recommended (i.e. the dissipation factor is pending test voltage). The DELTA4000 Series has a patented method for detecting voltage dependence and gives the user an alarm, suggesting additional tests should be performed at different voltage levels.
- Fast test time - Dynamic noise suppression minimizes actual test time.

Industry’s Lightest and Most Rugged

- Industry’s lightest two-piece design, weighing 14 kg + 22 kg saves on effort, space, and shipping costs.
- Designed for various work environments: in the field; in a test van; in a manufacturing facility; or in a repair facility.
- Units have performed successful testing in the world’s most extreme conditions including: high temperatures, low temperatures, high elevations, high noise, and high humidity.

Software Package — PowerDB Advanced

- Automatic and manual operation – provides fully automatic operation for tan delta as well as excitation current and tip-up testing. The user simply selects the test object and the unit will automatically run the complete test and report the results back to the test form. The DELTA4000 Series can also be used with Delta Control software in a manual testing mode, where the operator has full control to set the test parameters including the possibility to manually adjust the output voltage and measure output current and output voltage continuously.
- Easy to save and retrieve data – information will be saved in an XML file with all historical data. This allows the user to view previous year’s test sheet or trend specific test points.
- Simple, intuitive, easy-to-use interface between operator and instrument.
- Suspect data points are flagged visually with a red highlight.
- Capability to trend a specific asset over time.
- Easily recall transformer setups from the settings menu.
- Ability to interface with other transformer test units such as MLR10 (leakage reactance, capacitance banks), TTR-series (transformer turns ratio), MTO210 (winding resistance), MIT/S1-series (DC insulation), MCT-series (CT measurements).

Optional Database Software - PowerDB Pro

A comprehensive Acceptance and Maintenance Test Data Management Software and database that allows you synchronize information from all of your different types of instruments into a single database, trend test results to similar equipment and the ability to design or modify test forms.

- Easily import your historical data points even from other manufacturers' databases.
- Analysis and trending - As an immediate on-site assessment the user can compare the latest measurements with stored data and see how the insulation values may have changed over time (trending). Comparison of measurements captured at different voltages and different frequencies can also be observed. Pass/Fail criteria can be set to immediately identify a possible problem in your insulation.

PREMIUM SUPPORT

Region dependent; please contact your nearest Megger Sales Representative for details. Available in 1-yr, 3-yr, and 5-yr agreements.

- Extended product warranty protects your unit beyond the standard manufacturer’s warranty.
- Loaner units and loaner accessories provide guaranteed reliability. Loaners are delivered within 1-2 business days.
- Field application support provided by former utility engineers and PhD’s who have vast substation and transformer experience to guide you through your testing procedures and answer your questions.
- Software support and guidance through installation, importing older data, customizing forms, comparing results, and data trending.
- Annual onsite training on the equipment software, theory, field testing, data analysis, and PowerDB. Training can be provided on-site or at any of the Megger facilities.
DELTA4000 Series
12 kV Insulation Diagnostic System

SPECIFICATIONS

Input Power
90 - 264 V
45 - 66 Hz
16 A max
No loss in performance when used with portable generator. Also possible to use 12 V dc with optional inverter kit (P/N 35271-16)

Output Voltage
0 to 12 kV, continuously adjustable

Test Frequency Range
45-70 Hz (12 kV)
15-400 Hz (4 kV)
1-505 Hz (250V)
0.0001 Hz maximum resolution

Output Power
3.6 kVA

Output Current
300 mA (4 minutes)
200 mA (30 minutes)
100 mA (continuous)
The power supply capacity can be expanded to 4 A at 12 kV using the optional Resonating Inductor, (Cat. No. 670600-1).

Measuring Ranges

Voltage
25 V to 12 kV, 1 V resolution

Current
0 to 5 Amps, 0.1 μA maximum resolution. The measurement can be corrected to either 2.5 kV or 10 kV equivalents.

Capacitance
0 to 100 μF, 0.01 pF maximum resolution

Inductance
6 H to 10 MH, 0.1 mH maximum resolution

Power factor
0-100% (0-1), 0.001% maximum resolution

Dissipation factor
0-100 (0-10,000%), 0.001% maximum resolution

Watt Loss
0 to 2 kW, actual power, 0 to 100 kW when corrected to 10 kV equivalent. 0.1 mW maximum resolution. The measurement can be corrected to either 2.5 kV or 10 kV equivalents.

Temperature Correction

Intelligent temperature correction
from 5°C to 50°C insulation test temperature to 20°C reference

Standard tables
As by international standards and manufacturers’ data

Accuracy

Voltage ±(1% of reading + 1 digit)
Current ±(1% of reading + 1 digit)
Capacitance ±(0.5% of reading + 1 pF)
Inductance ±(0.5% of reading + 1 nH)
Power Factor ±(0.5% of reading + 0.02%)
Dissipation Factor ±(0.5% of reading + 0.02%)
Watt Loss ±1% of reading + 1mW
Frequency ±0.005% of reading

Measurement
The following test modes are available:

UST: Ungrounded Specimen Testing
UST-R: UST: Measure Red, Ground Blue
UST-B: UST: Measure Blue, Ground Red
UST-RB: UST: Measure Red and Blue

GST: Grounded Specimen Testing
GST-GND: GST: Ground Red and Blue
GSTg-R: GST: Guard Red, Ground Blue
GSTg-B: GST: Guard Blue, Ground Red
GSTg-RB: GST: Guard Red and Blue

Noise Immunity

Electrostatic
15mA induced noise into any test lead with no loss of measurement accuracy at maximum interference to specimen current of 20:1

Electromagnetic
500 μT, at 50/60 Hz in any direction

Computer Interface
Ethernet and USB

PC Requirements

DELTA4110
Operating system: Windows XP/Vista/7
Processor: Min Pentium 1 GHz
Memory: Min 1024 Mb RAM
Hard drive: Min 1 Gb available
Interface: USB and Ethernet

DELTA4310
Internal PC with 8.4” full-color VGA, full QWERTY keypad, navigational pushbuttons, and joystick (external mouse can be connected), on-screen view of test forms, USB printer interface.

Communication/Control/Data Management Software
PowerDB and DELTA Control

Environment

Temperature
Operating: -20 to +55° C (-4 to +131° F)
Storage: -50 to +70° C (-58 to +158° F)

Relative humidity
Operating: 0 to 95% non-condensing
Storage: 0 to 95% non-condensing

Standards

Safety
IEC/EN 61010-1:2001

Shock and vibration
IEC 68-2-31, first edition, drop and topple (push over)
IEC 68-2-31, second edition, free fall
ISTA 2A

EMC

FCC 47 CFR Part 15 Class A Emissions requirements (USA) (FCC Subpart B of Part 15 Class A)
AS/NZS CISPR 11:2004 Class A ISM Emissions requirements (Australia)
IEC/EN 61010-4-2/3/4/5/6/8/11
IEC/EN 61000-6-2

Test Equipment Specifications Met: IEC/EN 61000-6-4,

Dimensions
Control Unit: 290 x 290 x 460 mm (11 x 11 x 18 in.)
High Voltage Unit: 290 x 290 x 460 mm (11 x 11 x 18 in.)
*Does not include handles.

### Included Accessories
- High voltage lead: 21 m (70 ft), double shielded 30012-11
- Measurement lead, color-coded red 25572-1
- Measurement lead, color-coded blue 25572-2
- Ground lead: 9 m (30 ft) 2002-131
- Input power cable 25A EU 17032-23
- Input power cable 16A US 17032-20
- Input power cable 16A UK 17032-21
- Input power cable 16A no plug 17032-22
- Safety hand switch, Interlock #1: 18 m (60 ft) 1001-850
- Safety hand switch, Interlock #2: 2.5 m (8 ft) 1001-851
- HV unit power cable, 1 m (3 ft) 2002-132
- HV unit control cable, 1 m (3 ft) 2002-133
- Ground lead cable, 1 m (3 ft) 2002-134
- USB cable, 2 m (7 ft) CA-USB
- Ethernet cable, CAT 5, 2 m (7 ft) 36798
- Soft padded carrying case for control unit [1] 2001-766
- Soft padded carrying case for HV unit [1] 2001-766
- Soft case for HV cable 2001-507
- Soft case for other cables/accessories 2001-506
- User manual 81331
- Warranty [1 year]
- PowerDB software

### Optional Software
- PowerDB Pro software, on USB dongle DB1001S-A
- PowerDB Pro software, via soft key DB1001-A

### Extended Warranty and Annual Support
- Priority Access annual support plan D4K-P-ACCESS
- Product warranty Y12-WARRANTY
- Training D4K-TRAINING
- PowerDB software maintenance and upgrades D4K-SOFTWARE
- 24/7 technical support D4K-TECHSUPPORT
- Engineering consulting and results analysis D4K-ENGCONSULT
- Loaner unit and accessories D4K-LOANER

### Optional Accessories
- Hot collar straps [3] P/N 670505
- Digital temperature and humidity meter [1] P/N 670504
- “J” probe bushing tap connector [1] P/N 30917
- 1 m (3 ft) non-insulating shorting lead [3] P/N 34726-1
- 2 m (6 ft) non-insulating shorting lead [3] P/N 34726-2
- Digital temperature and humidity meter 670504
- External temperature and humidity probes 2002-138
- Safety foot switch 1001-852
- External strobe, 3 m (9 ft) Y37181
- External strobe extension cable, 18 m (60 ft) 1001-853
- Transport cart / trolley 1001-530
- Calibration box set for CAL4000 2002-137
- Calibration standard 670500-1
- Transit cases for calibration standard 670635
- HV TTR capacitor, single phase (10 nF, 10 kV) 36610
- HV reference capacitor (100 pF, 10 kV) 36610-1
- HV reference capacitor (1000 pF, 10 kV) 36610-2
- Carry case for capacitors 36610-CC
- Capacitor kit (TTR cap, 2 ref caps, carry case) 36610-KIT2
- Inverter kit 35271-16
- Resonating inductor 670600-1
- Thermal Pentax® printer, 120 V 36493-1
- Thermal Pentax® printer, 240 V 36494-1-KIT
- Thermal paper (8.5” x 11”) for printer 36809-1
- Thermal paper (A4) for printer 36809-2
- Oil test cell 670511
- Hot collar belts [3] 670505
- Bushing tap connectors [2] 670506
- USB bar code wand and software 36528
- Special length cables available upon request Consult factory

### Additional Transformer Test Products
- Leakage Reactance MLR
- Turns Ratio, 3-phase TTR
- Winding Resistance MTO
- Sweep Frequency Response Analysis (SFA) FRAX
- Dielectric Frequency Response (DFR) and moisture assessment IDAX
- DC Insulation MIT/S1
- Current Transformer Measurements MCT

### Ordering Information

**DELTA4000 Series**

**12 kV Insulation Diagnostic System**

**Included Accessories**
- High voltage lead: 21 m (70 ft), double shielded 30012-11
- Measurement lead, color-coded red 25572-1
- Measurement lead, color-coded blue 25572-2
