Vacuum Ovens
VO101

Digital pressure control ensures rapid and gentle vacuum drying, its speed controlled vacuum pump (accessory) saves around 70% energy.

The direct contact between the load and the heatable and removable thermoshelves in the chamber of the Memmert vacuum oven VO ensures rapid and uniform temperature control of food, cosmetics, watches, books, PCBs or injection molds, without the loss of heat.

On this page, you can find all the essential technical data on our vacuum drying oven. Our customer relations team will be pleased to help if you want further information.

* inert gas inlet only for V049, V0101 with Premium module
