### VibroFlex QTec

The Polytec VibroFlex laser Doppler vibrometer is a modular high-performance solution for non-contact vibration measurement. It offers unrivalled measurement performance and versatility for solving pressing vibration issues in both R&D and industrial quality control.

The VibroFlex family comprises the front-end VibroFlex Connect and a selection of non-contact laser sensor heads. Integrated with the VibSoft data acquisition and analysis software, the vibration measurement system is ready to go. Study acoustics, dynamics and vibrations on nano to macro structures without contact and with laser precision. The VibroFlex QTec sensor head delivers the highest optical sensitivity, enabling high-fidelity measurements on all surfaces – even on dark, biological, rotating or moving objects. This safe laser technology is perfect for challenging applications such as NDT, biomedical, long distance displacement measurements, quasi-static displacement measurement and shaker feedback control. QTec makes vibration measurements faster, easier and more reliable than ever – for the most robust, unambiguous results.

VibroFlex – the new flexibility of laser vibration measurement.

## **VibroFlex QTec**

Powerful on all surfaces Preliminary datasheet

# - -

**Polytec** 

### !

### Highlights

- Spare performance SNR improvement up to 20 dB or a factor of 10
- Make use of every quantum of light for unparalleled optical sensitivity
- High-fidelity data with no surface preparation – even dark, biological or moving objects
- From µm-sized to large, distant objects
- No limits with a high dynamic range up to 30 m/s
- Fast remote and auto focus for best signal quality
- Match range and depth of field with interchangeable lenses

## Technical data

### General specifications

1

| VibroFlex QTec VFX-I-160   |
|--|
| 6.1 kg   |
| IP40   |
| 135 x 121 x 383 mm   |
| +5 °C +40 °C (41 °F 104 °F)  |
| -10 °C +65 °C (14 °F 149 °F)   |
| max. 80%, non-condensing   |
| VibroFlex Connect  |
| ± 30 m/s   |
|  |
| QTec heterodyne multi-path interferometer utilizing reception diversity.<br>Protected by international patents   |
| Measurement laser: invisible (IR), wavelength 1550 nm, output power <10 mW<br>Targeting laser: visible (green), wavelength 510 - 530 nm, effect. output power < 1 mW |
| Class 2, with both lasers in operation   |
| Auto focus <sup>1</sup> , remote focus, manual focus <sup>2</sup>  |
| Up to 100 m (with VFX-O-LRI long range front lens, surface dependent)  |
|  |

Immunity:

- <sup>1</sup> Used auto focus range can be limited individually for shorter cycle time.
- <sup>2</sup> Quick and easy operation of all focus functions with turning knob on sensor head, on touch screen of front-end VibroFlex Connect or remote controlled from a computer or digital device.
- <sup>3</sup> Measured from the front edge of the front lens.
- Included with VFX-O-FMI-02 Fiber Lens (IR).
- <sup>5</sup> Optional available for VFX-O-FMI-02 Fiber Lens (IR).

# Options and accessories
