

OFV-505 Sensor Head

Polytec's OFV-series single point laser vibrometers determine vibrational velocity and displacement of structures quickly and very precisely.

The sensor head OFV-505 integrates interferometer, laser and imaging optics in a stable housing.

The sensor head achieves its highest signal quality when combined with the digital OFV-5000 Vibrometer Controller.

Highlights

- Fast and low-noise results thanks to auto and remote focus
- Well-suited for dark surfaces and long measurement distances
- Flexibility thanks to variable working distance and interchangeable lenses
- Visible laser spot ensures easy alignment and focusing
- Eye-safe laser
