## LIMITED WARRANTY & LIMITATION OF LIABILITY

**TESCO** warrants to the original purchaser that it will correct all defects in material and/or workmanship in the instrument, test equipment or software covered by this warranty (herein called "PRODUCT"), provided that TESCO is notified of such defect within the warranty period (set forth below) in accordance with paragraph four of this Warranty.

**WARRANTY PERIOD.** The warranty period shall begin on the date of shipment of the PRODUCT or the date of the issuance of this warranty certificate, whichever is later. If no warranty period is specified below and signed by an authorized DISTRIBUTOR of TESCO, the Warranty Period shall be one (1) year. In no event shall this Warranty remain in effect for more than the stated Warranty Period plus two (2) months after the date of shipment. TESCO's sole obligation and the purchaser's sole remedy under this Warranty is limited to repair or replacement, at TESCO's option, free of charge, F.O.B. TESCO's factory at Bristol, PA of any workmanship and/or part which in TESCO's sole judgment displays evidence of defect. On-site Warranty repairs will be made when in TESCO's judgment the PRODUCT cannot practically be shipped to TESCO's factory. Any modifications, additions or upgrades made to the PRODUCT or control software after this warranty becomes effective shall not extend the term of this warranty.

**COVERAGE.** The warranty set forth above shall be applicable only if the PRODUCT:

1. Is used for the specific purpose for which it was intended;
2. Is operated in accordance with instructions, if any, supplied by TESCO;
3. Has not been modified, neglected, altered, tampered with, vandalized, abused or misused, or subjected to accident, fire, flood or other casualties;
4. Has not been repaired by unauthorized persons;
5. Has not had its serial number altered, defaced or removed;
6. Has not been connected, installed or adjusted other than in accordance with the instructions, if any, furnished by TESCO.

The warranty set forth herein DOES NOT APPLY to defects resulting from ordinary wear, tear and usage, or any cause, similar or dissimilar, not resulting solely from defective material and/or workmanship.

The Warranty set forth herein shall NOT be effective unless:

1. Notice of defect is given to TESCO by phone, fax, email, or mail as soon as the defect is discovered.
2. Notice of defect contains the following information: PRODUCT serial number, PRODUCT model number, date of original installation, and an accurate and complete description of the defect including the exact circumstances leading to the defect.
3. The defective PRODUCT or part is returned only upon authorization from TESCO as evidenced by the issuing of a Return Merchandise Authorization (RMA) number, and that the transportation charges are prepaid (except that TESCO may, at its option, appoint a qualified DISTRIBUTOR to make field inspections of the PRODUCT for which purpose the purchaser shall permit such DISTRIBUTOR to enter upon its premises and examine the PRODUCT).
4. The Return Merchandise Authorization (RMA) number is written on the shipping label and all paperwork defective PRODUCT or part.
5. The defective PRODUCT or part is returned in the original packing or packing approved by TESCO

TESCO is not responsible for drayage charges, damages or labor costs incurred in conjunction with failure, removal, or reinstallation of any PRODUCT, all of which shall be at the purchaser's expense. TESCO is not responsible for special, incidental, or consequential damages, whether resulting from breach of warranty, negligence, or any other reason.

TESCO manufactured parts will be available for a minimum period of at least two years after the manufacture of a PRODUCT has been discontinued.

TESCO will provide original purchaser during the Warranty Period, unlimited telephone consulting time for the purpose of PRODUCT trouble shooting/servicing and for the first thirty (30) days of the Warranty Period, unlimited telephone consulting time for the purpose of PRODUCT/software application.

**THE WARRANTY CONTAINED HEREIN IS IN LIEU OF ALL OTHER WARRANTIES AND TESCO MAKES NO OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, WARRANTIES OR CONDITION, DESIGN, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR ANY OTHER MATTER.**

No other Warranty, express or implied, is authorized by TESCO, and no DISTRIBUTOR of TESCO or any other person has any authority to amend, extend, modify, enlarge, or otherwise alter the foregoing warranty and disclaimers in any way whatsoever, except as provided for in an Extended Limited PRODUCT Warranty Agreement.

## 1.1 Introduction

**TESCO's Electric Vehicle Supply Equipment (EVSE) Test System** is a complete system that consists of the EVSE Tester and Programmable Load, which tests the accuracy of energy delivery using a transactional mode compatible with HB44 provisions. The EVSE Tester tests AC Level 1 and Level 2 systems up to 80 amps maximum current. For complete freedom and test automation, add the PL4000 Programmable Load, a dedicated load emulator solution providing no-load and adjustable-load modes. Any compatible EV can also be used as the test load by using the appropriate optional cable. The Proximity and Pilot Control signal exchanges are fully verified for compliance with protocol requirements. The EVSE's GFCI can also be tested by applying a programmable line-earth fault current up to 200mA.

## 1.2 Contacting TESCO

For Technical Support or Calibration/Repair, please call 215.228.0500.

You can also send an email to [support@tescometering.com](mailto:support@tescometering.com) with any questions.

To view, print, or download the latest manual supplement, visit [instrument.tescometering.com](http://instrument.tescometering.com).

## 1.3 General Safety Summary

This manual contains information and warnings that must be observed to ensure safe operation and keep the TS400 in a safe condition. Operation or service in conditions or in a manner other than specified could compromise safety. For the correct and safe use of this device, **it is essential that both operating and service personnel follow accepted safety procedures in addition to the safety precautions specified**, including PPE guidelines.

In this manual, a **WARNING** identifies conditions and actions that pose hazard(s) to the user, while a **CAUTION** identifies conditions and actions that may damage the T4000 or the test equipment.

**To avoid electrical shock, personal injury, or fire hazard:**

- Both devices, T4000 and PL4000 must not be switched ON if it is damaged or suspected to be faulty.
- Do not operate the device in wet, condensing, dusty, or explosive gas conditions.
- If the equipment is used in a manner not specified in this manual, the protection provided by the T4000 and the PL4000 may be impaired.
- Whenever it is likely that safety protection has been impaired, the devices must be made inoperative and be secured against any unintended operation. Inform qualified maintenance or repair personnel.
- Safety protection is likely to be impaired if, for example, the T4000 displays visible damage or fails to operate normally.

## 1.4 Description of Safety-related Icons

ICONS	DESCRIPTION
	Risk of danger. Important information. See manual.
	Hazardous voltage. Risk of electrical shock.

## 1.5 Product Features

### 1.5.1 Key Features

- Accurate Energy Measurement
- Uses EVSE Connectors: J1772 (CCS1), Tesla (**TBD**), CHAdeMO (**TBD**)
- Innovative GUI on a 7" LCD Screen
- Lightweight, water-tight, crush-proof, and dust-proof case
- All chargers, test sequences, and test results are stored in internal database
- Compatible with EV charging protocols: SAEJ1772, SAEJ2847, DIN70121, and TESLA AC

### 1.5.2 Standard Features – Tester

	<b>GRAPHICAL USER INTERFACE</b> Displayed on a 7", 1024x600, high brightness, daylight readable LCD
	<b>ETHERNET</b> 100 BaseT with support for: Web Services, Remote Control, Database Access
	<b>USB PORTS</b> 2X USB TypeA with support for: Device, External Memory Storage, WiFi, Keyboard, Mouse
	<b>GPS (GLOBAL POSITIONING SYSTEM)</b> Integrated GPS system provides location information for automatic determination of test site and database access.
	<b>GFCI (GROUND FAULT CIRCUIT INTERRUPTER)</b> Provision is provided to test the GFCI functionality the EVSE (0 – 200mA).
	<b>RS232</b> Legacy port for specialized test configurations.
	<b>INTERNAL BATTERY</b> 99.6Wh Li-Ion removeable battery
	<b>PL INTERFACE</b> Provides communications and power to a Programmable Load (PL4000-001, PL4000-101).

### 1.5.3 Standard Features – Programmable Load

	<b>AC LEVEL 1</b> Provides appropriate load current required up to 32A
	<b>AC LEVEL 2</b> Provides appropriate load current required up to 50A.
	<b>PROGRAMMABLE LOAD CURRENT MODES</b> Capable in handling different testing modes: No Load (NL), Starting Load (SL), Light Load (LL) & Full Load (FL).
	<b>EV COMMUNICATION PROTOCOL</b> AC: Control Pilot + Proximity Detection

## 1.6 General Specifications

### 1.6.1 Measurement Capabilities

PARAMETERS	DATA
<b>Voltage</b>	AC – Up to 3 channels 60VAC to 350 VAC isolated DC – One channel 60 to 1000VDC
<b>Current</b>	AC – Up to 3 channels 0.2 to 80 Amps fully isolated DC – One channel 1.0 to 200A fully isolated
<b>Power</b>	Active Energy, Reactive Energy, Apparent Energy
<b>Harmonics</b>	Harmonics to the 50th

### 1.6.2 Measurement Accuracy

PARAMETERS	DATA
<b>AC Voltage</b>	(60V to 350), 0.05% of reading (3 Phase)
<b>AC Current</b>	(0.2A to 80A), 0.05% of reading $\pm$ 0.005 Amp (3 Phase)
<b>AC Phase</b>	$\pm$ 0.01 degrees
<b>AC INSTRUMENT, WHRS</b>	$\pm$ 0.08% of reading $\pm$ 0.002 Wh
<b>DC Voltage</b>	(60V to 1000V), 0.05% of reading
<b>DC Current</b>	(1.0A to 20A), 0.1% of reading $\pm$ 0.01 Amp (20A to 200A), 0.05% of reading $\pm$ 0.01 Amp
<b>INSTRUMENT, WHRS</b>	(1.0A to 20A), 0.1% of reading $\pm$ 0.01 Wh (20A to 200A), 0.05% of reading $\pm$ 0.01 Wh

### 1.6.3 Physical

PARAMETERS	DATA
<b>Display</b>	7" Super high contrast, 1000nit color display with bonded glass optical filter/protector
<b>I/O</b>	<ul style="list-style-type: none"> <li>• Ethernet</li> <li>• 2X USB 2.0 Type A (peripherals such as keyboard, mouse, memory stick, barcode scanner)</li> <li>• 1X USB 2.0 Type B (connection to PC)</li> </ul>
<b>Power</b>	±0.01 degrees
<b>AUX Power</b>	±0.08% of reading ± 0.002 Wh
<b>GPS</b>	±0.05% of reading

## 1.6.4 Dimensions

PARAMETERS (T4000)	DATA
<b>Length</b>	21.2" (53.84 cm)
<b>Width</b>	16" (40.64 cm)
<b>Height</b>	10.6" (26.92 cm)
<b>Weight</b>	≈44 lbs (≈19.95 kg)

PARAMETERS (PL4000)	DATA
<b>Length</b>	16.9" (42.9 cm)
<b>Width</b>	16.3" (41.4 cm)
<b>Height</b>	26" (66.04cm)
<b>Weight</b>	≈63.9 lbs (≈29 kg)

## 1.6.5 Environment

PARAMETERS	DATA
<b>Operating Temp (Min / Max)</b>	-4°F to 122°F (-20°C to 50°C)
<b>Storing Temp (Min / Max)</b>	-22°F to 140°F (-30°C to 60°C)

## 1.7 About this Operations Manual

This manual provides complete information for setting up and operating the T4000. This document instructs the user on the following operations of the T4000:

- Setup and Installation
- Front, Side, and Rear Panel Features
- Graphical User Interface (GUI)
- Operating Procedures
- Instrument Maintenance

# **2.0 SETUP & INSTALLATION**

<b>2.1 Introduction .....</b>	<b>7</b>
<b>2.2 Unpacking and Inspection .....</b>	<b>7</b>
<b>2.3 Set up, Airflow and Cooling Considerations .....</b>	<b>7</b>
<b>2.3.1 Setup and Placement .....</b>	<b>7</b>
<b>2.3.2 Airflow .....</b>	<b>8</b>
<b>2.3.3 Cooling considerations .....</b>	<b>9</b>

<b>2.5 Connection and Power-Up .....</b>	<b>9</b>
<b>2.5.1 Sequence of Test Connection and Power-Up .....</b>	<b>10</b>
<b>2.5.2 Power-Down and Sequence of Disconnection .....</b>	<b>10</b>

## 2.1 Introduction

This chapter provides instructions for unpacking and installing the instrument.

Read this chapter before you operate the instrument. Instructions for cable connections can be found here.

## 2.2 Unpacking and Inspection

The instruments are shipped in a container designed to prevent damage during shipping.

Inspect the instruments carefully for damage, and immediately report any damage to the shipper. A packing list is included in the packaging. When you unpack the instruments, check for all the standard equipment listed and check the shipping order for any additional items ordered. Report any shortage to the place of purchase, to your distributor, or directly to TESCO.

## 2.3 Set up, Airflow and Cooling Considerations

### 2.3.1 Setup and Placement

The instruments are designed to be used sitting on the ground, as long as there is sufficient space to allow adequate ventilation. The instruments can be vertically oriented as well. Please see suggested placement per setup.

Figure 2.3a Suggested EVSE Test System Setup sitting on the ground

Figure 2.3b Suggested Vertical Oriented Setup

### 2.3.2 Airflow

**WARNING**

Note of the instrument's airflow as indicated in the illustration below. PL4000 air outflow can be extremely hot particularly when testing at higher load current or power. Please allow back space of at least 2 meters for the PL4000 air outflow.

### 2.3.3 Cooling considerations

#### CAUTION

**Damage caused by overheating may occur if the area around the air intake is restricted, the intake air is too warm, or the air filter becomes clogged.**

The inlet and exhaust holes must be clear of obstruction. The air entering the instrument must be between -20 °C and 50 °C. Make sure that exhaust from another instrument is not directed into the fan inlet. Check and clean the air filter every 30 days or more frequently if the Instrument is operated in a dusty environment.

## 2.4 Main & Auxiliary Power Supply

The instrument can be powered by its internal rechargeable battery or auxiliary AC line. The battery is capable of up to 8 hours of continuous operation. The battery charge status icon can be seen in the top right corner of the EVSE Tester's LCD screen.

Fully charging the battery may require up to 5 hours and may be done with the unit on or off.

The auxiliary power source is protected by a 6A fuse in L1 & L2 individually. An AC line power cord is provided.

#### WARNING

**To avoid electrical shock, personal injury, or fire hazard, connect the factory supplied power cord to a properly grounded AC power outlet to charge the unit when not being used with an EVSE charger.**

**Do not charge the unit when it is connected to an EVSE charger.**

## 2.5 Connection and Power-Up

The instrument's connector employs a "make first, break last" system where upon insertion, the ground connection is established first before making power connection and maintain ground until after power connections are broken. This system helps ensure a safer connection.

## 2.5.1 Sequence of Test Connection and Power-Up

- 1- Connect the COMBITAC of PL4000 to the LOAD & CONTROL connector of the Tester.
- 2- Connect the Coupler of EVSE to the J1772 connector of the Tester.
- 3- To Power ON, press the POWER button for at least 2 seconds.

## 2.5.2 Power-Down and Sequence of Disconnection

### WARNING !

T4000 should be turned off properly before the connectors are disconnected.

- 1- To turn off T4000, return to Main Menu and press the power button for at least 2 seconds. A dialog box appears to confirm shutdown.
- 2- Disconnect the Coupler of EVSE from the CCS1/ChaDemo/Tesla inlet of Tester.
- 3- Disconnect the CombiTac of PL4000 from the LOAD & CONTROL inlet of Tester.

### 3.3.3 MANUAL TESTING

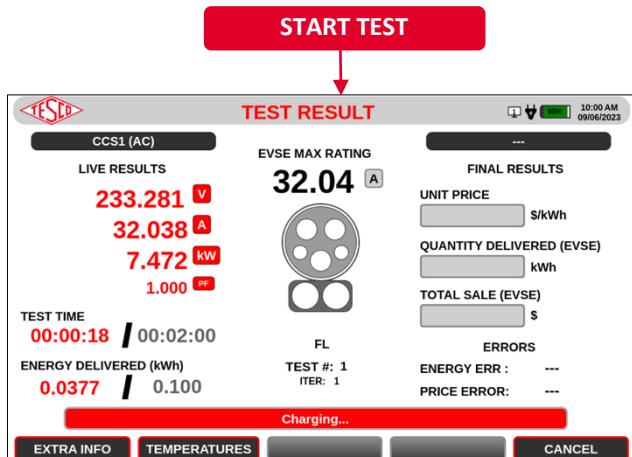

SCREEN	DESCRIPTION															
  	<p><b>CHARGER INFORMATION</b> Before proceeding to Manual Testing, select the necessary charger details first.</p> <p><b>INPUT FIELD:</b></p> <table border="1"> <tr> <td>CHARGER</td> <td>Charger name</td> </tr> <tr> <td>PORT</td> <td>Port Number</td> </tr> <tr> <td>PORT TYPE</td> <td>Type of Connector</td> </tr> <tr> <td>GPS LOCATE</td> <td></td> </tr> </table>	CHARGER	Charger name	PORT	Port Number	PORT TYPE	Type of Connector	GPS LOCATE								
CHARGER	Charger name															
PORT	Port Number															
PORT TYPE	Type of Connector															
GPS LOCATE																
	<p><b>SELECT TEST TYPE</b></p> <p><b>FUNCTION KEYS</b></p> <table border="1"> <tr> <td>F1</td> <td>SIMULATION</td> <td>Select SIMULATION test type.</td> </tr> <tr> <td>F2</td> <td>MAN IN THE MID</td> <td>Select MAN IN THE MIDDLE test type.</td> </tr> <tr> <td>F3</td> <td></td> <td></td> </tr> <tr> <td>F4</td> <td></td> <td></td> </tr> <tr> <td>F5</td> <td></td> <td></td> </tr> </table>	F1	SIMULATION	Select SIMULATION test type.	F2	MAN IN THE MID	Select MAN IN THE MIDDLE test type.	F3			F4			F5		
F1	SIMULATION	Select SIMULATION test type.														
F2	MAN IN THE MID	Select MAN IN THE MIDDLE test type.														
F3																
F4																
F5																

The screenshot shows the TESCO app's setup process. It starts with the "SELECT TEST TYPE" screen, which offers two options: "SIMULATION" (represented by a red cube icon) and "MAN IN THE MIDDLE" (represented by a car icon). Both options have sub-options below them. A red arrow points from the "SIMULATION" option to a red button labeled "SIMULATION TEST". This leads to the "SIMULATION TEST" configuration screen. This screen includes a table for "LOAD TESTS" and an "OTHER TESTS" section. The "LOAD TESTS" table has columns for Type, Num of Tests, Load, Time, and Energy (kWh). The "Time" column contains the instruction "WHICHEVER COMES FIRST". The "OTHER TESTS" section includes checkboxes for GFCI TEST and DIODE TEST. A red arrow points from the "START" button on this screen to a red button labeled "START TEST".

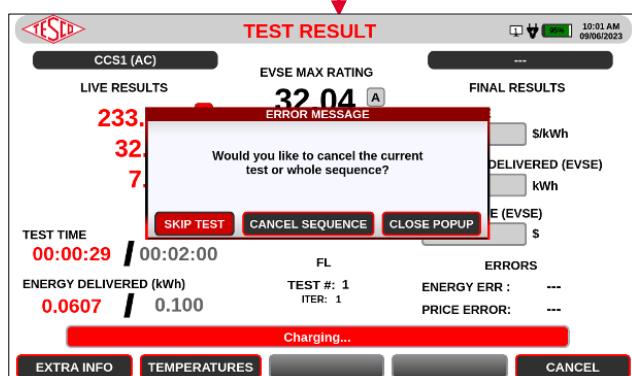

**SIMULATION TEST**

- NL - No current flowing
- SL – 0.5A – 2.9A
- LL – 5% - 15% of the EVSE Max Current Rating
- FL - 85% - 100% of the EVSE Max Current Rating
- ADV – 1% - 100% of the EVSE Max Current Rating
- GFCI TEST
- DIODE TEST

**\*Note**  
Users have the option to set either a timeout duration or a target energy level. Entering a value of zero indicates no timeout or no target energy will be set. If both values are provided, the test will end when either the timeout is reached or the target energy level is achieved, whichever occurs first.

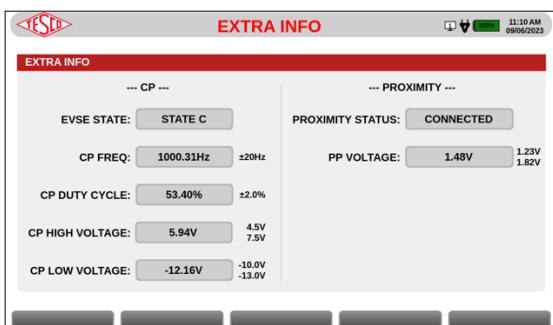

Once 'START' was clicked. The Test Result Page will then be displayed.

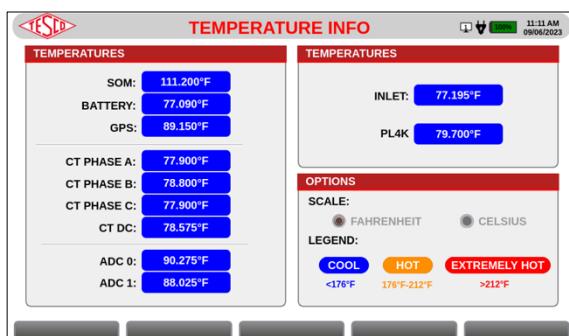

#### FUNCTION KEYS

<b>SKIP TEST</b>	Skip the test and proceed to the next test in the sequence.
<b>CANCEL SEQUENCE</b>	Cancel the whole sequence.
<b>CLOSE POPUP</b>	Close the Error Message popup.

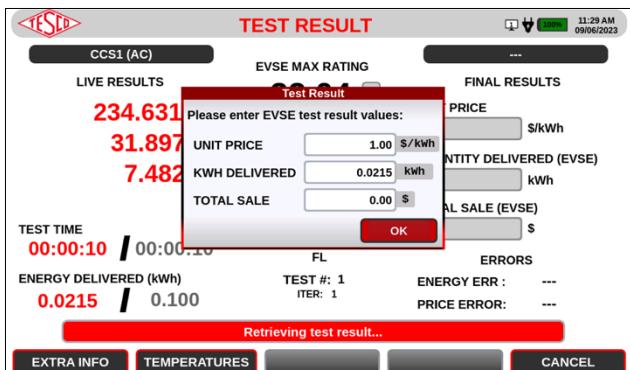

*Note: If a user wishes to cancel, they can press F5 (CANCEL), which will trigger a popup. In this popup, they have the option to either Skip the current test that's running, Cancel the entire sequence, or simply close the popup.*

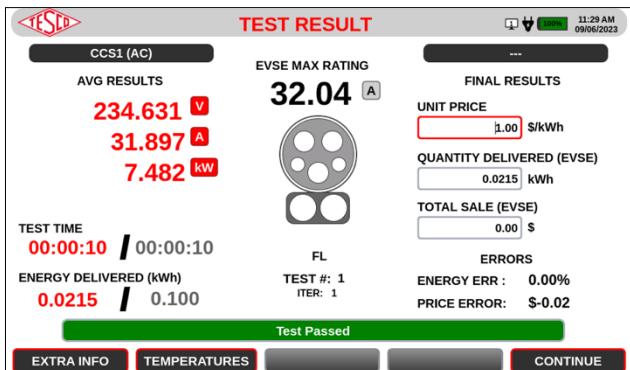

While a test is in progress, a user can press F1 (EXTRA INFO) to access CP & Proximity information.

Additionally, pressing F2 (TEMPERATURES) allows them to view the temperatures of various components.

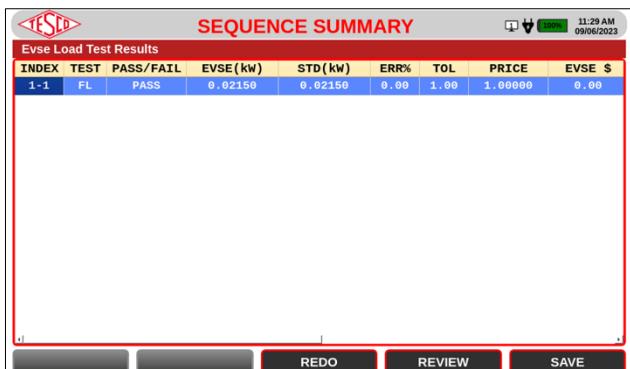

Once the test is complete, a "Test Result" popup box will appear, allowing the user to enter the test result values from the EVSE charger.

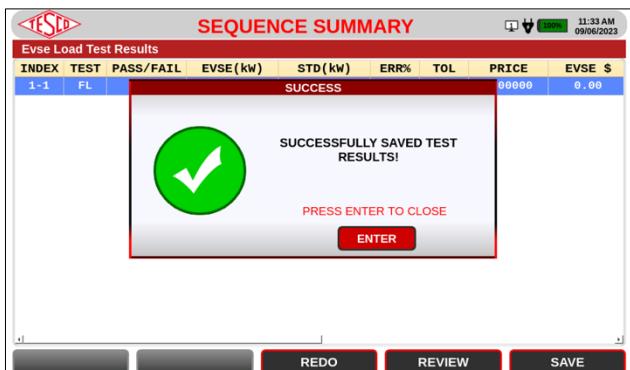

Upon entering the result values, the final results will be displayed.

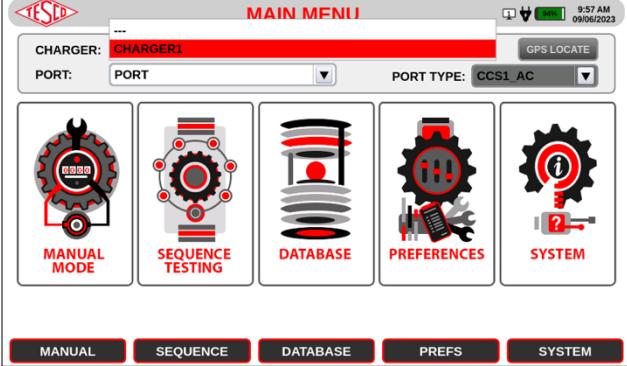

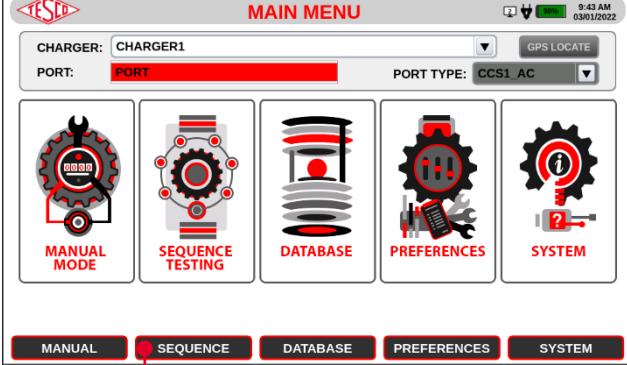

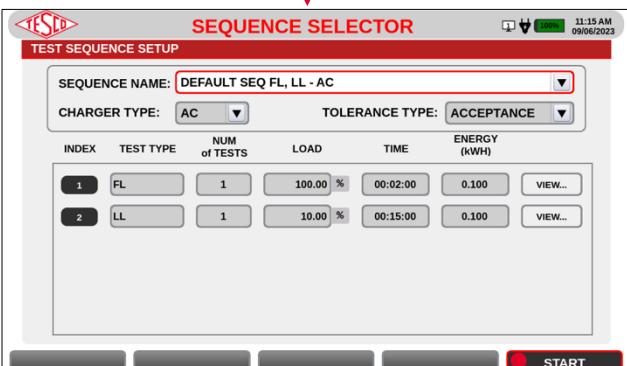

Click 'Continue' to advance to the next test. If this is the final test, you will be directed to the Sequence Summary Page.

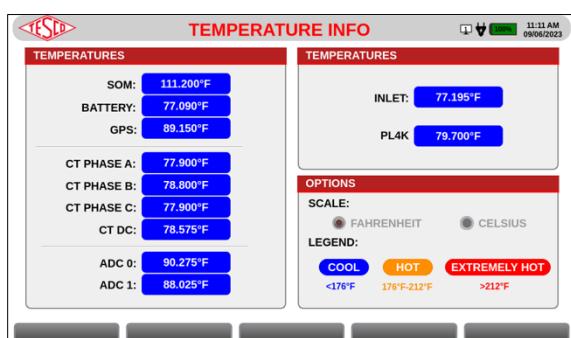

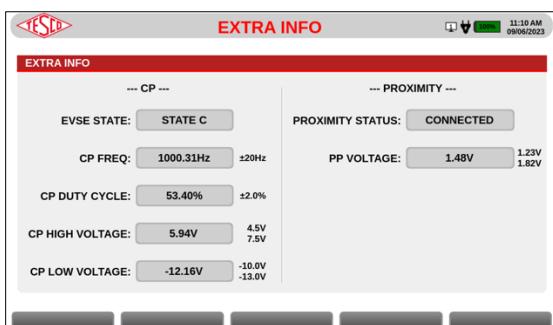

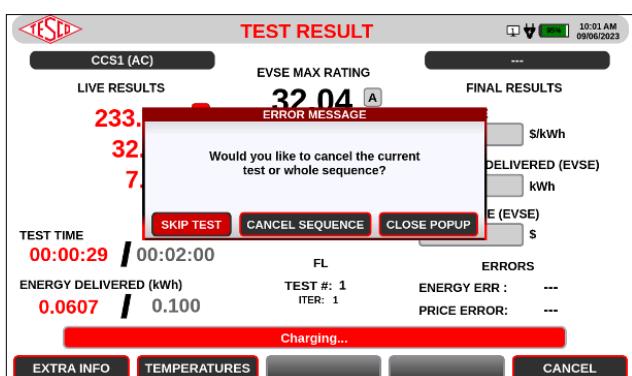

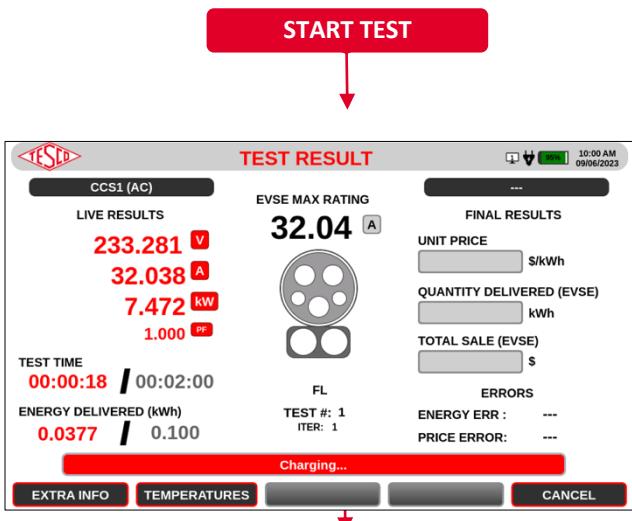

Users have the option to either redo a specific test by pressing F3 (REDO), view additional test results with F4 (REVIEW), or save the test result using F5 (SAVE).

### 3.3.4 TEST SEQUENCES

SCREEN	DESCRIPTION															
	<p><b>CHARGER INFORMATION</b> Before proceeding to Manual Testing, select the necessary charger details first.</p> <p><b>INPUT FIELD:</b></p> <table border="1" style="width: 100%; border-collapse: collapse;"> <tr> <td style="padding: 2px;"><b>CHARGER</b></td><td style="padding: 2px;">Charger name</td></tr> <tr> <td style="padding: 2px;"><b>PORT</b></td><td style="padding: 2px;">Port Number</td></tr> <tr> <td style="padding: 2px;"><b>PORT TYPE</b></td><td style="padding: 2px;">Type of Connector</td></tr> <tr> <td style="padding: 2px;"><b>GPS LOCATE</b></td><td style="padding: 2px;"></td></tr> </table>	<b>CHARGER</b>	Charger name	<b>PORT</b>	Port Number	<b>PORT TYPE</b>	Type of Connector	<b>GPS LOCATE</b>

# 4.0 MAINTENANCE

<b>4.1 Introduction .....</b>	<b>33</b>
<b>4.2 Cleaning the Instrument External Surface .....</b>	<b>33</b>
<b>4.3 Repair / Parts Replacement / Recalibration .....</b>	<b>33</b>

## 4.1 Introduction

Most of the maintenance will be handled by the technical team from TESCO. The user can, however, perform the basic maintenance routine of cleaning the EVSE Test System's external surface.

## 4.2 Cleaning the Instrument External Surface

Clean the exterior of the EVSE Test System using a soft cloth slightly dampened with either water or a non-abrasive mild cleaning solution that is not harmful to plastics.

**Do not use hydrocarbons or chlorinated solvents for cleaning. They can damage the plastic materials used in the Site Analyzer.**

## 4.3 Repair / Parts Replacement / Recalibration

For the EVSE Test System's repair, parts replacement, and recalibration, directly contact TESCO through phone or email. See section **1.2 Contacting TESCO** for contact details. TESCO recommends recalibration on an annual basis. Further details can be found on the Calibration Certificate provided with your Site Analyzer.
