The Avtron Minuteman Load Bank is a portable, self-contained AC resistive load bank designed for indoor use.

The Minuteman Load Bank is the new standard in ultra-compact, portable load banks! The load bank provides up to 100 KW resistive load at 480 VAC or 240 VAC, 3 phase, 60 Hz. This versatile load bank weighs only 78 lbs. [35 kg], is lightweight and ultra-compact. The load bank is also rated for *continuous* operation, unlike most competitive units.

The Minuteman Load Bank features horizontal air discharge to provide a low profile design. Fully-rated, quick-connect load terminals and simple operation allow the load bank to be set up and operated by a single technician, saving valuable time in the

field. The load bank controls and cooling fans are powered by any standard 120 VAC, single phase wall outlet with detachable line cord provided.

An integral control panel is provided for load bank operation and includes the necessary controls and status indicators. The load bank also includes the Avtron Advanced Digital Monitoring System (ADMS)™ as a standard feature. The ADMS meter provides faceplate digital display of Volts, Amps, Frequency, and KW. Data Logging Software (included at no additional cost) allows Real Time Data Acquisition and trending of all meter parameters from your Laptop

PC or PDA. An Infrared/USB interface cable is included for "Plug and Play" convenience.

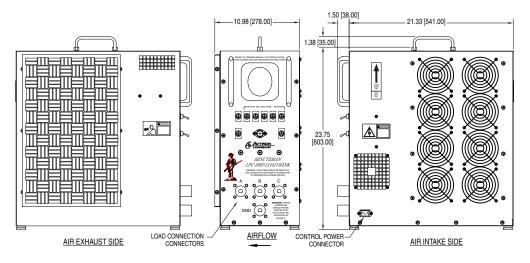

Legendary Avtron quality combined with simple operation and maintenance will provide years of trouble free service.

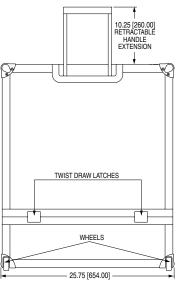

Avtron's extensive line of Load Bank and Industrial Resistor Products are solid performers used throughout the world.
