

#### STANDARDS:

ASTM C1583, ASTM D4541, ASTM D7234-12, AS/NZS 1580.408.5, BS 1881-207, DIN 1048-2, EN 1015-12, EN 12636, EN 13144, EN 1542, EN 24624, ISO 16276-1, ISO 4624, JIS K 5600 5-7, NF T30-606, NF T30-062

## **Automatic Pull-Off Adhesion Gauge**

The Elcometer 510 Automatic Pull-Off Adhesion Gauge accurately measures the strength of the bond between the coating and the substrate.

Elcometer 510 Model T: Made for iPhone 6 Plus, iPhone 6, iPhone 5, iPhone 5, iPhone 5, iPhone 4, iPad Air 2, iPad mini 3, iPad Air, iPad mini 2, iPad (3rd and 4th generation), iPad mini, iPad 2, and iPod touch (4th and 5th generation). "Made for iPhone," and "Made for iPad" mean that an electronic accessory has been designed to connect specifically to iPod touch, iPhone, or iPad, respectively, and has been certified by the developer to meet Apple performance standards. Apple is not responsible for the operation of this device or its compliance with safety and regulatory standards. Please note that the use of this accessory with iPod touch, iPhone, or iPad may affect wireless performance.

## Powerful

Suitable for use of metal, wood, concrete and other substrates

- Smooth load application up to 100MPa (14400 psi)
- USB and Bluetooth® data output to iOS<sup>†</sup> or Android™ devices
- Stores up to 60,000 readings in 2,500 batches

## Durable

- Sealed, heavy duty and impact resistant
- Dust and waterproof equivalent to IP64
- Suitable for use in harsh environments

## Efficient

- Ideal for laboratory and field inse Pull-Off
- 10, 14.2, 20 and 50mm (0.39, 0.56, 0.76 & 1.96") diameter reusable dollies
- Compatible with ElcoMaster<sup>®</sup> and ElcoMaster<sup>®</sup> Mobile App
- Measures on small, curved and flat surfaces

## Accurate

- Measurement range up to 100MPa (14400 psi) with an accuracy of ±1% of full scale
- Can be used in accordance with National & International Standards

<sup>\*</sup> Elcometer 510 gauges are supplied with a one year warranty against manufacturing defects. The warranty can be extended to two years via www.elcometer.com

<sup>†</sup> Compatible with iPod, iPhone and iPad.

## **Automatic Pull-Off Adhesion Gauge**

## Key Features Explained

Automatic adhesion tester with selectable pull rates for 10, 14.2, 20 & 50mm diameter dollies.

View trend graphs or live statistics alongside the reading value

Individual user definable pull rate graphs can be saved with each reading.

Stores individual readings and pull rate graphs in up to 2,500 alpha numeric batches, together with date, time and attribute information

Either pull to maximum or pull to preset limit. Unique time hold feature allows users to set a delay before pressure returns to zero.

Save cohesive and adhesive failure attributes alongside your adhesion pull data in accordance with National and International Standards.

## Testing coatings on low bond strength substrates

When testing coatings on low bond strength substrates such as concrete, wood or other fibrous materials, a larger surface area of dolly (50mm) is required to provide accurate, repeatable and reproducible results.

The Elcometer 510 is available as a Concrete Adhesion Tester Kit, or 50mm accessory items (skirt, dolly, cutter) can be added to existing Elcometer 510 adhesion kits.

## Elcometer 510

Powered by either standard rechargeable batteries or AC mains\*. Each battery charge performs up to 200 pulls. Battery recharge time <300 minutes.

Transfer data to your PC via USB or Bluetooth® for further analysis with ElcoMaster® software or view live pull rate graphs in ElcoMaster® during the test.

Using wireless Bluetooth® communication link the gauge to an Android™ or iPhone<sup>‡</sup> mobile device. Live GPS coordinates from your mobile device can be added to reports and emailed instantly.

A range of interchangeable thin & standard substrate skirt adaptors allow each gauge to be used with 10, 14.2, 20 or 50mm diameter reusable dollies, ideal for testing coatings on thin, thick, flat or convex substrates.

The optional magnetic anchor clamp ensures the actuator doesn't fall during tests on vertical surfaces or testing at height.

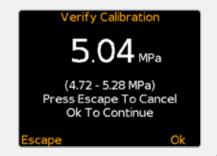

Supplied in a robust plastic carry case for easy transportation to and around the job site.

## Adhesion Verification Unit for Verification in the Field

The Elcometer 510 gauge's inbuilt Adhesion Verification feature allows users to connect the gauge to the Elcometer AVU to verify gauge accuracy in the field.

\* Model T only.

‡ iPod, iPhone and iPad compatible.

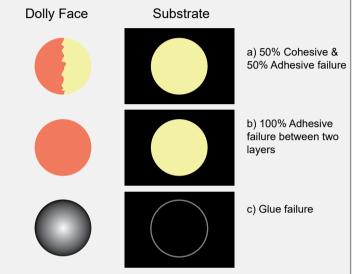

## **Automatic Pull-Off Adhesion Gauge**

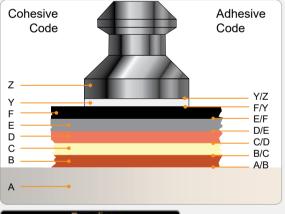

## Assessing The Results - Failure Attributes

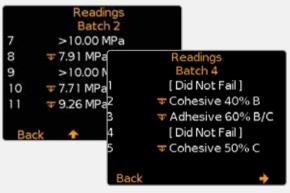

Many National and International Standards, including ISO 4624 & ASTM D4541, require the user to record not only the pull-off force but also the nature of the failure. This is done by examining the bottom of the dolly and assessing the failure. In 'Advanced' mode on the Elcometer 510 it is possible to select the 'Attributes' feature (Menu/Setup/Gauge Mode/Advanced) allowing the nature of the fracture to be recorded against each reading and stored within the batch.

#### **Examining The Dolly**

- a) Cohesive Failure: The coating fails within the body of a coating layer leaving the same coating on the surface and on the dolly face.
- b) Adhesive Failure: Failure occurs at the interface between layers (intercoat) where one pulls away from the other. The "coating" on the dolly face will not be the same as that on the test area.
- c) Glue Failure: When no coating is present on the dolly it must be recorded as a failure of the glue. This may be due to incorrect or insufficient mixing of the component parts of the adhesive, incompatibility between the adhesive/coating/dolly/test surface.

Cohesive Failure Layerd		Adhesive Failure Layers	
Code	Description	Code	Description
A	Substrate	A/B	Substrate & Layer 1
В	Layer 1	B/C	Layer 1 & Layer 2
С	Layer 2	C/D	Layer 2 & Layer 3
D	Layer 3	D/E	Layer 3 & Layer 4
Е	Layer 4	E/F	Layer 4 & Layer 5
F	Layer 5	F/Y	Layer 5 & Glue
Υ	Glue	Y/Z	Glue & Dolly

The data is saved in the batch and can be viewed at any time displayed as

##.## MPa <sup>e</sup>	N% A M% A/B, where;
##.## MPa <sup>e</sup>	<ul> <li>Pull Force in MPa or other measurement units (psi, Newtons or Nmm<sup>-2</sup>)</li> </ul>
N% A M% A/B	<ul> <li>Cohesive failure percentagef</li> <li>Cohesive failure layer</li> <li>Adhesion failure percentagef</li> <li>Intercoat adhesive failure layers</li> </ul>

<sup>&</sup>lt;sup>d</sup> The number of layers can be user defined for each batch via Batch/New Batch/Number of Layers. This will affect the number of layers available for selection during attribute recording. The maximum number of layers available is five, excluding the substrate and glue.

<sup>&</sup>lt;sup>e</sup> Or equivalent units. <sup>f</sup> To the nearest 10%, in line with International Standards.

## **Elcometer 510**

Create instant reports with ElcoMaster®

What you do with the collected the readings themselves.

ElcoMaster® is a fast, easy to use software solution for all your data management and quality assurance needs, preparing professional inspection reports at the click of a button.

Whether you are out in the field or on the factory floor, using the ElcoMaster® Mobile App users can;

- Store live readings directly on to a mobile device and save them into batches.
- View the pull rate graph in real-time for the duration of the test.
- Add attribute data to each individual batch reading.
- Add photographs of the dolly and test surface to each individual batch reading at the click of a button.
- Plot individual readings on to a location map, photograph or diagram.
- Inspection data can be transferred from mobile to PC for further analysis and reporting.
- Generate instant .pdf¹ report for submission.

Combine different inspection parameters (such as dry film thickness, surface profile, salt contamination, climate or adhesion) together with images, notes and other project specific information into customised reports.

## Data transferred from the gauge to ElcoMaster® includes;

- Adhesion Measurements
- Date & Time
- · Cohesive/Adhesive Failure Attributes
- Dolly size
- Pull rate graph
- Pull to Limit/Max
- · Limit values
- Limit Hold Time
- Cutting Device
- Number of Layers
- Skirt Type/Support Ring Dimensions
- Batch Information & Statistics
- Calibration Information
- Calibration Verification Date/Time

<sup>1</sup> Available on iOS devices only

 <sup>&</sup>lt;sup>1</sup> Including Actuator with Standard Skirt fitted.
 <sup>†</sup> 50mm (2") dollies are supplied in packs of 4.

## **Automatic Pull-Off Adhesion Gauge**

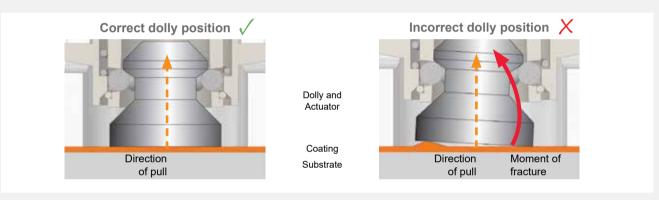

#### Pull-Off Adhesion Tests - Preventing Adhesive and Cohesive Failures

#### Preparing the surface and dolly

- 1. Select an appropriate test area which is flat and has sufficient area to attach the adhesion gauge.
- 2. Abrade the dolly and surface, clean both to remove any dust minimising the risk of an 'adhesive' failure.

#### Fixing the dolly

- 3. Mix the adhesive correctly and apply a uniform adhesive film over the entire dolly face.
- 4. Test Standards require that the dolly is pulled off perpendicularly to the test surface. The dolly must therefore be adhered on to a prepared flat test surface (see images below). Apply an even pressure to the dolly to ensure that the dolly face is parallel to the test surface.
- 5. Remove any excess adhesive from around the dolly and allow to fully cure. Tape maybe required when applying dollies to vertical surfaces during the cure process.
- 6. If required, once the dolly has fully cured, score the coating around the dolly using the dolly cutter provided.
- 7. Attach the gauge actuator to the dolly and begin test.

#### Assessment of the Adhesion Test

For a valid pull test the coating must cover at least 50% of the area of the dolly face. If the glue fails and no coating is present on the dolly, or it covers less than 50% of the dolly face area, the pull-test is invalid and should be repeated.

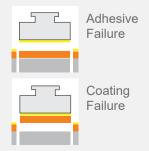

When the coating has failed within the layer leaving the same coating on both the dolly and the test panel it is known as a 'cohesive failure'.

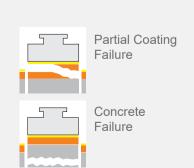

'Adhesive failures' occur when either the coating has failed at the interface with another coating (leaving a coating on the dolly and another coating on the substrate), or when the coating has failed at the substrate (leaving the coating on the dolly and the substrate bare).

NOTE: If the glue fails at a value above the specification then it can be reported that the adhesion exceeded the specification for this individual test.

#### **Coating Adhesion Testing on Concrete**

## **Adhesion Verification Unit (AVU)**

## **Elcometer AVU**

The Elcometer AVU has been designed to provide users with the means to confirm the accuracy of their pull-off adhesion gauge.

Due to its robust design the Elcometer AVU is suitable for use on site or in the laboratory and allows users to verify or self-certify their pull-off adhesion gauges.

A range of dolly adaptors are available for testing the Elcometer 106, Elcometer 506 and Elcometer 510 adhesion gauges. Adaptors are also available for testing other manufacturers' gauges.

Attach the appropriate dolly adaptor to the AVU, connect your adhesion gauge, apply load and compare the adhesion tester value to the reading on the AVU Display.

#### Features include:

- · Max hold and live reading display
- MPa / psi switchable units
- Backlit display
- · Automatic switch off

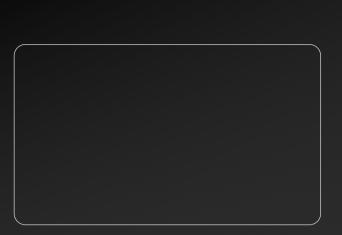

The Elcometer AVU is supplied with either a test certificate or full calibration certificate, suitable for self-certification.

Technical Specificat	ion	С	
Part Number	Description	Certificate	
T99923924	Elcometer AVU Adhesion Verification Unit	•	
T99923924C	Elcometer AVU Adhesion Verification Unit - Certified	0	
Range	0-30MPa (0-4000psi)		
Resolution	0.01MPa (1psi)		
Accuracy	±0.1MPa (±14.5psi)		
Battery Type	2 x AA batteries		
Gauge Dimensions	165 x 155 x 105mm (6.5 x 6.1 x 4.1")		
Gauge Weight	3kg (6.6lbs)		
Packing List	Elcometer AVU, Elcometer 506/510 20mm (0.76") dolly adaptor, test or calibration certificate (as appropriate), 2 x AA batteries, carry case and operating instructions		
Accessories			
T99923935	Elcometer 506 & 510 Dolly Adaptor; 20 & 14.2mm (0.76 & 0.56") Skirts		
T99923936	Elcometer 506 & 510 Dolly Adaptor; 50mm (2.0") Skirt		
T99923937	Elcometer 106 Dolly Adaptor; Scales 1 to 4		
T99923938	Elcometer 106 Dolly Adaptor; Scale 6		
T99923939	AT-M & AT-A Adhesion Gauge Dolly Adaptor		
T99923986	PAT Adhesion Gauge Dolly Adaptor		

Test Certificate supplied as standard.

 $<sup>\,{}^{\</sup>bigcirc}\,$  Calibration Certificate supplied as standard.
