

REFRIGERATED HEATING CIRCULATORS

TopTech | HighTech

JULABO cold as ice: cool refrigeration technology.

Refrigerated circulators made by JULABO are used worldwide. Whether in research, material testing or in technical systems – the well proven and reliable technology is valued by users in all industries worldwide. The JULABO range of circulators offers the functional solution for your day-to-day work, whether it is a routine task or highly demanding: TopTech and HighTech – two model series for every requirement.

Powerful.

- Working temperature ranges from -50 °C to +200 °C
- Powerful circulating pumps – electronically adjustable in steps
- Intelligent warning and safety functions – for more safety
- Unique early warning system for low liquid level (DBGM)
- Digital and analog interface for flexible communication
- Removable venting grid for quick dust removal
- Active Cooling Control: Maximum cooling capacity at all temperatures

Refrigerated heating circulators – technical data

The refrigerated circulators of the TopTech and HighTech series provide a heating capacity of 1 kW or 2 kW as well as a temperature stability of ± 0.01 °C, for MA models, the temperature stability amounts to ± 0.02 °C.

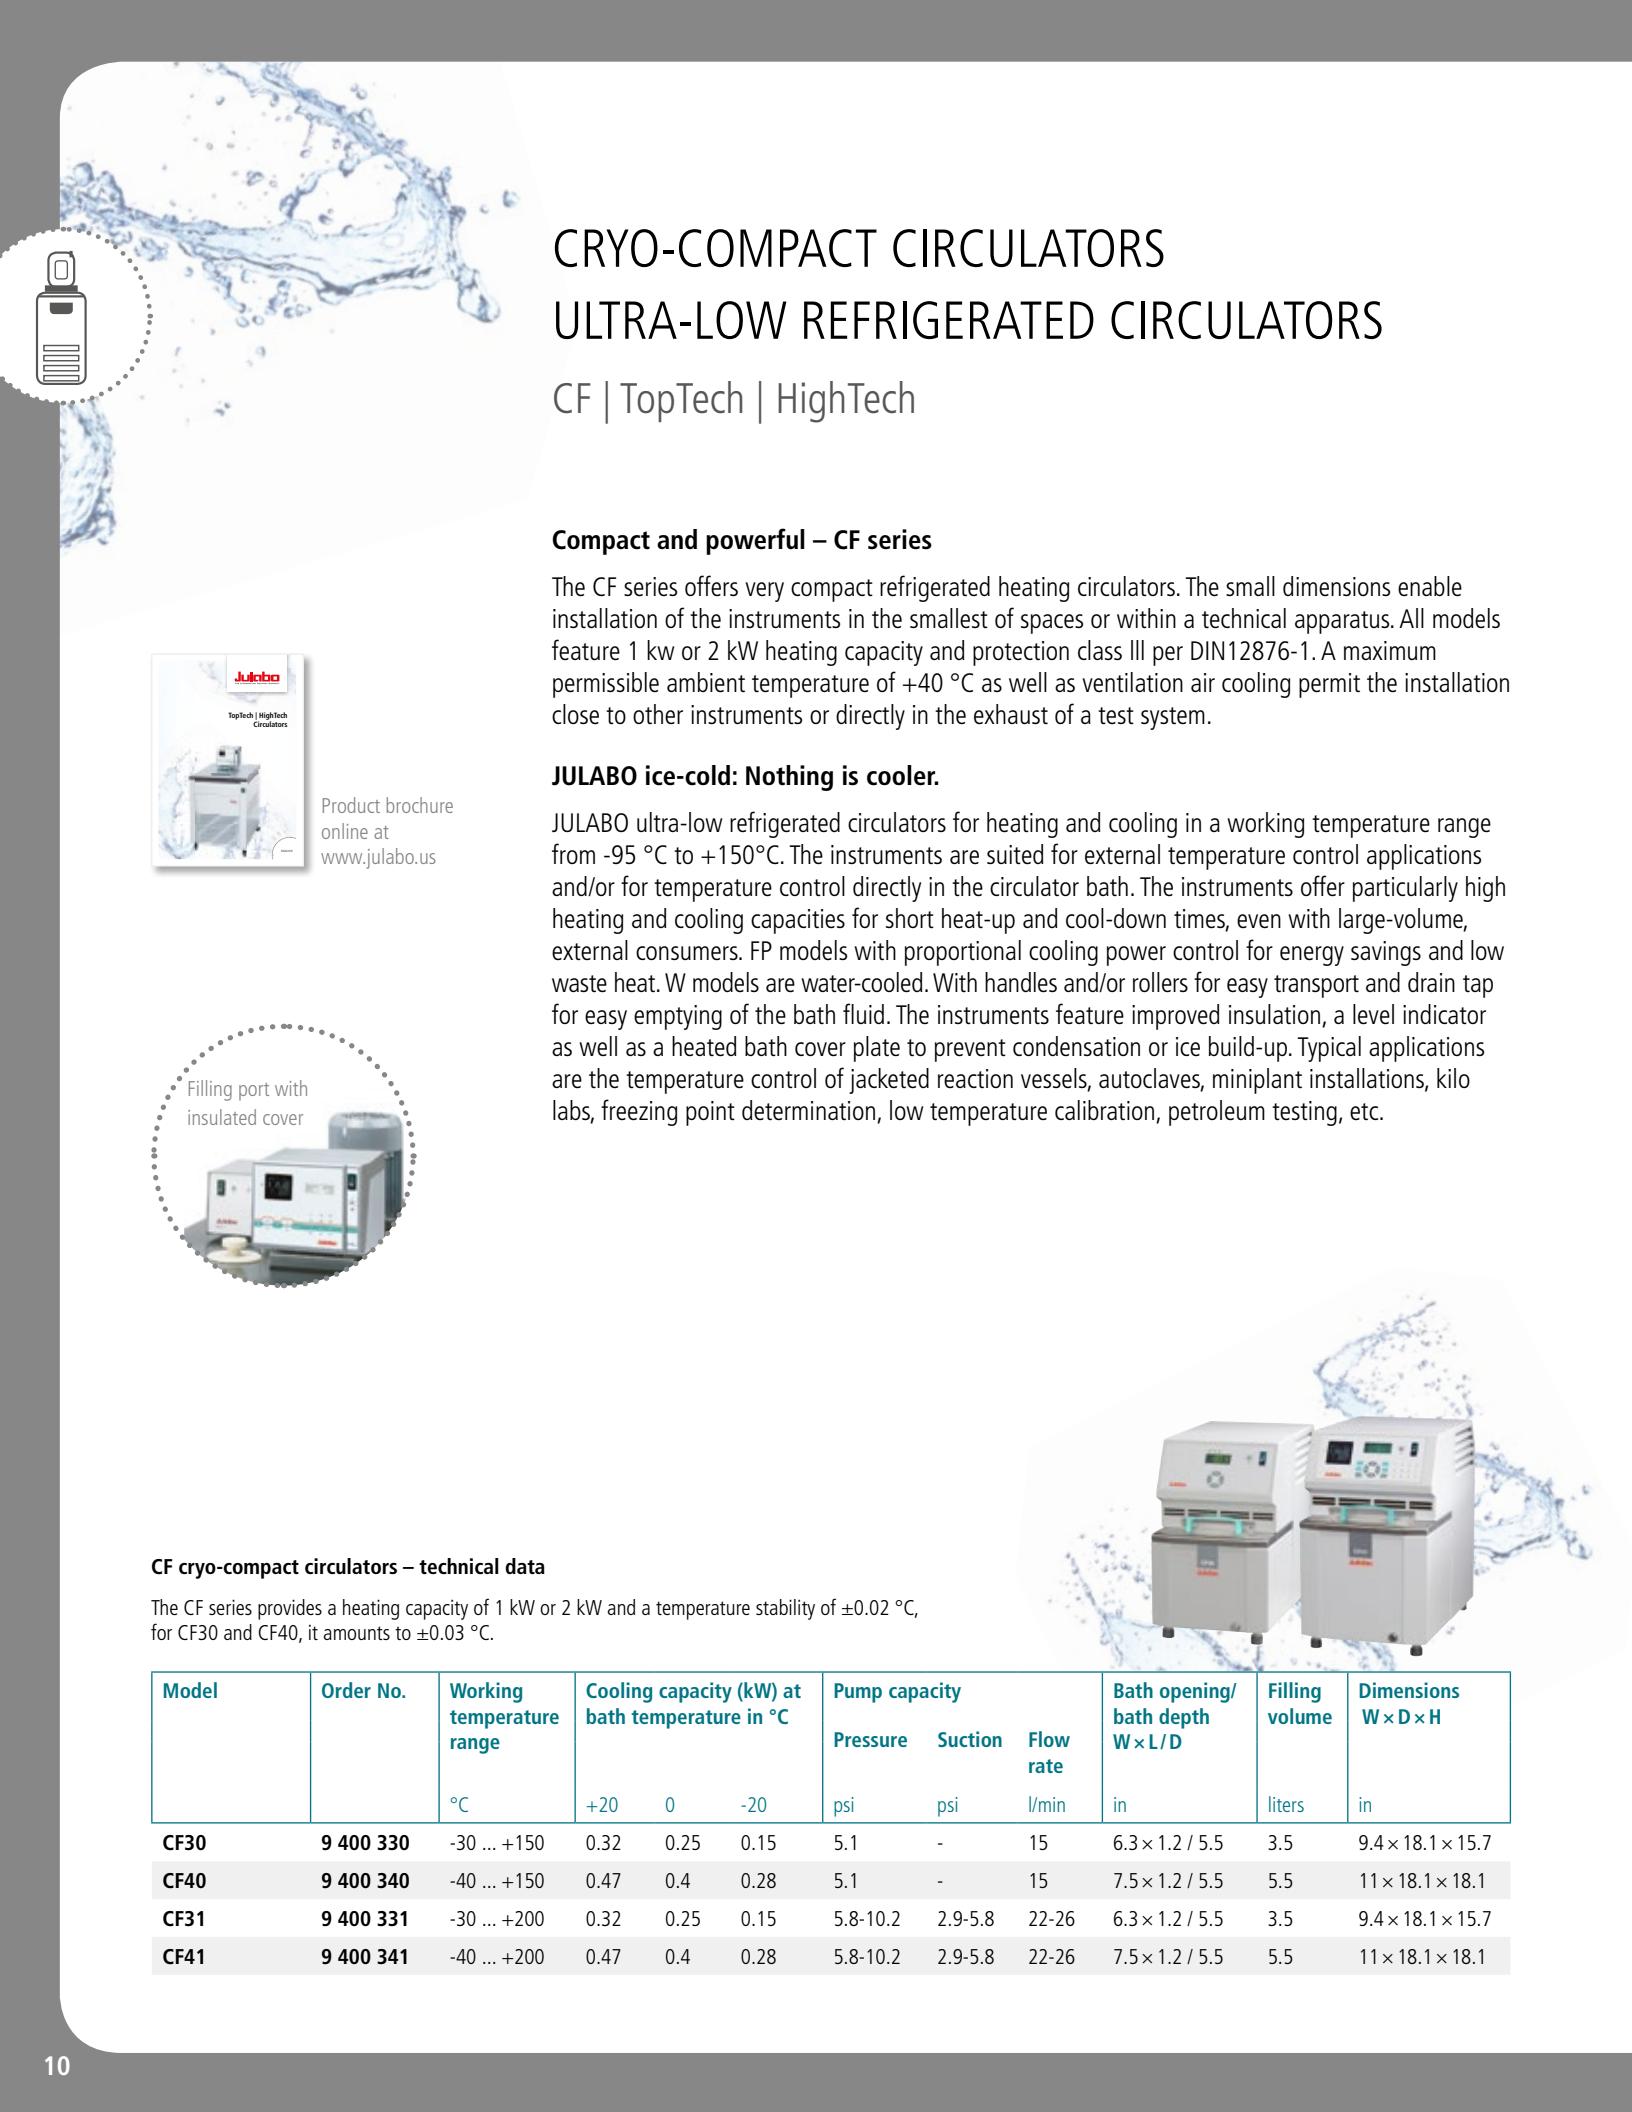

Model	Order No.	Working temperature range °C	Cooling capacity (kW) at bath temperature in °C			Pump capacity			Bath opening/bath depth W×L/D in	Filling volume liters	Dimensions W×D×H in
			+20	0	-20	Pressure psi	Suction psi	Flow rate l/min

CRYO-COMPACT CIRCULATORS

ULTRA-LOW REFRIGERATED CIRCULATORS

CF | TopTech | HighTech

Compact and powerful – CF series

The CF series offers very compact refrigerated heating circulators. The small dimensions enable installation of the instruments in the smallest of spaces or within a technical apparatus. All models feature 1 kW or 2 kW heating capacity and protection class III per DIN12876-1. A maximum permissible ambient temperature of +40 °C as well as ventilation air cooling permit the installation close to other instruments or directly in the exhaust of a test system.

JULABO ice-cold: Nothing is cooler.

JULABO ultra-low refrigerated circulators for heating and cooling in a working temperature range from -95 °C to +150°C. The instruments are suited for external temperature control applications and/or for temperature control directly in the circulator bath. The instruments offer particularly high heating and cooling capacities for short heat-up and cool-down times, even with large-volume, external consumers. FP models with proportional cooling power control for energy savings and low waste heat. W models are water-cooled. With handles and/or rollers for easy transport and drain tap for easy emptying of the bath fluid. The instruments feature improved insulation, a level indicator as well as a heated bath cover plate to prevent condensation or ice build-up. Typical applications are the temperature control of jacketed reaction vessels, autoclaves, miniplant installations, kilo labs, freezing point determination, low temperature calibration, petroleum testing, etc.

CF cryo-compact circulators – technical data

The CF series provides a heating capacity of 1 kW or 2 kW and a temperature stability of ±0.02 °C, for CF30 and CF40, it amounts to ±0.03 °C.

Model	Order No.	Working temperature range °C	Cooling capacity (kW) at bath temperature in °C			Pump capacity			Bath opening/bath depth W×L/D in	Filling volume liters	Dimensions W × D × H in
			+20	0	-20	Pressure psi	Suction psi	Flow rate l/min			
CF30	9 400 330	-30 ... +150	0.32	0.25	0.15	5.1	-	15	6.3 × 1.2 / 5.5	3.5	9.4 × 18.1 × 15.7
CF40	9 400 340	-40 ... +150	0.47	0.4	0.28	5.1	-	15	7.5 × 1.2 / 5.5	5.5	11 × 18.1 × 18.1
CF31	9 400 331	-30 ... +200	0.32	0.25	0.15	5.8-10.2	2.9-5.8	22-26	6.3 × 1.2 / 5.5	3.5	9.4 × 18.1 × 15.7
CF41	9 400 341	-40 ... +200	0.47	0.4	0.28	5.8-10.2	2.9-5.8	22-26	7.5 × 1.2 / 5.5	5.5	11 × 18.1 × 18.1

Ultra-low refrigerated circulators – technical data

The ultra-low refrigerated circulators of the TopTech and HighTech series feature a heating capacity of 3 kW, except the F89-ME, FP89-HL models (heating capacity 1.3 kW). All models offer a temperature stability of ± 0.05 °C, except the ME & HE models, which offer ± 0.02 °C, and FPW91-SL with ± 0.2 °C temperature stability.

Model	Order No.	Working temperature range °C	Cooling capacity (kW) at bath temperature in °C			Pump capacity			Bath opening/bath depth W×L/D in	Filling volume liters	Dimensions W×D×H in
			+20	0	-20	Pressure psi	Suction psi	Flow rate l/min
